

SCALE DISSOLVER RX-4423

Description

RX-4423 is a high-performance scale dissolver designed to effectively dissolve barium sulphate and mixed sulphate scales.

Application

RX-4423 dissolves barium sulphate scales significantly faster than most conventional barium sulphate scale dissolvers.

RX-4423 may be applied in the form supplied or mixed with fresh or brackish water in a 1:1 ratio.

RX-4423 should not be mixed with high calcium brines as reduction in activity could occur.

The performance of RX-4423 is greatly enhanced at temperatures above 60° C.

Properties

Appearance	Colourless to pale yellow
Odour	Low Odour
Specific Gravity	1.26 – 1.28
Boiling Point	N/A
Flash Point	>100°C
Viscosity	30 cP
Hazard Class	Xi Irritant
CHARM	GOLD

Handling

No special procedures need to be observed. Normal precautions should be taken and protective clothing, goggles and PVC/rubber gloves should be worn.

Packaging

Available in 208 litre drums, 1,000 litre IBC's or in exact quantities supplied in tanks of up to 4,500 litre capacity.
